EDUCATION

B.Tech, Computer Science Engineering, Gitam University, Visakhapatnam GPA: 7.47	June 2019 – May 2023
12th, Science, Narayana Junior College, Visakhapatnam CGPA: 8.25	May, 2017 – May, 2019
10th, CBSE, V.S. Vidyalaya, Sunabeda CGPA: 8.0	May 2016

SKILLS

Languages	JavaScript, HTML, CSS, Sass, JSON, REST
Frameworks	ReactJS, NodeJS, Express, Bootstrap
Tools	Git, Figma, NPM, Firebase, React Hooks
Soft Skills	Adaptability, Teamwork, Communication, Decision-making, Work Ethic, Leadership

WORK HISTORY

Associate, PricewaterhouseCoopers (PWC) — March, 2023 - present

- I received Salesforce administration training and worked as a Salesforce Administrator on a Trimble project, responsible for managing and maintaining the Salesforce platform to support sales processes and workflows.
- My responsibilities encompassed tasks such as user management, security settings, data management, customization, and reporting
- I successfully managed the Salesforce platform, utilizing my skills in JavaScript, Apex, HTML, and CSS to support sales processes and workflows.

Front end Developer Intern, pCloudy — March, 2022 - June, 2022

- Managed a website improvement project, enhancing UI and end-to-end service processes.
- Successfully restructured the website, resulting in a significant 55% improvement in UI and website interaction.
- Utilized expertise in HTML, CSS, SASS, JavaScript, and WordPress to drive the project's implementation and achieve desired outcomes.

PROJECTS

Squad Code: Web-Based Code Compiler - ReactJS, Node, Socket.io — [GitHub]

- Implemented a user-friendly interface with intuitive code highlighting and auto-indentation features to enhance the coding experience.
- Utilized socket.io, a JavaScript library, to implement real-time data synchronization among multiple users. This enables seamless collaboration and ensures that changes made by one user are immediately reflected for all participants.
- Developed the web application using React Hooks, a feature introduced in React for managing state and other functionalities in functional components. This allowed for a more modular and efficient codebase, enhancing the overall development experience.
- Incorporated a real-time chat feature within the coding environment, enabling users to communicate with each other while working on collaborative projects. This facilitates effective communication and collaboration, fostering a productive coding environmen

Fortify: A Chat Application - ReactJS, Sass, Firebase GitHub

- Developed a secure and privacy-focused chat application utilizing React and Firebase technologies. The application ensures robust security measures to protect user data and interactions.
- Leveraged Firebase's real-time database capabilities to enable seamless and synchronized communication between users.
- Implemented Firebase's data synchronization features to enable real-time updates and notifications for a seamless chat experience.

Pixzzi: A Chat Application - ReactJS, Hooks, Api GitHub

- Professional and user-friendly website offering a wide array of high-quality images for free download.
- Advanced filtering options available for sorting images by relevance, popularity, and chronological order.
- Intelligent search functionality enables users to easily locate images using relevant keywords.
- Simplified access and downloading process for images, enhancing creative projects.
- Diverse collection of visually captivating visual content to enhance the quality and impact of creative projects.

Filterpaper: An online photo editor - ReactJS, Hooks, CSS GitHub

- Developed a high-quality photo editing application with a user-friendly interface.
- Empowered users to make precise adjustments to their images, including contrast, brightness, hue, saturation, and more.
- Provided a smooth and intuitive editing experience for seamless photo enhancement.
- Integrated a convenient download feature, allowing users to save and share their edited images effortlessly.
- Ensured professional-grade functionality and performance to meet the demands of photo editing enthusiasts.

CryptoLand: Review all top 100 Crypto currencies at one place - ReactJS, SASS GitHub

- Developed a real-time cryptocurrency market analysis platform for the top 50 cryptocurrencies.
- Integrated data from reputable exchanges to provide accurate information on name, symbol, price (BTC and fiat), market cap, and percent changes (1h, 24h, 7d).
- Designed an intuitive user interface with interactive charts and graphs for visualizing price trends and market fluctuations.
- Implemented robust data analytics tools to enable informed investment decisions and identify patterns.
